Papers

Future

Structure

Papers

Wbb/WH : **Style Review** → **Collab Review**
starting this week

Zb / Zj : **Group Review** → **Style Review** then
Collab Review starting next week

WW : still in EB, soon in **Group review**

Then, hopefully within a month:

Hbb

H→WW

Future

Other analyses pushed to full Pass2 dataset:

TC / Wbb (preliminary exists)

WH e-mu combined

Wb / Wj (to be started)

H \rightarrow gamma-gamma (preliminary exists)

Z + jets

Z bb

Z \rightarrow bbbar

Z bb with Z \rightarrow nunubar

Charged Higgs analyses

Packages

Pass2 analyses won't have yet common format, however we strongly encourage the use of:

Athena

Top_Analyze

TMB tree

Let's try to associate other current private toople makers to one of these 3 packages, the sooner the better.

Organization

We'd like to "compactify" our organization:

Have only 2 subgroups:

- 1) WH/ZH style analyses (e,mu) i.e. merge current LMJ and dilepton groups
- 2) Multijet group (as is, i.e. including taus)

Goal is to share widely experience across different analyses and minimize effort duplication.

These subgroups will meet weekly on Thursday (with one exception, since Thursday of B weeks we also have general meeting).

One rep. for a) Trigger; b) Simulation c) CSG
