References:

For these lectures, I have borrowed extensively and shamelessly from the graphic and pictorial material in the following books, articles, etc.

Books:

- A. Beiser, Concepts of Modern Physics, McGraw-Hill (1963).
- B. Foster and P. H. Fowler (ed), 40 Years of Particle Physics, Hilger (1987).
- W. H. Cropper, The Quantum Physicists, Oxford (1970).
- O. R. Frisch (ed), Progress in Nuclear Physics, Pergamon (1961).
- S. L. Glashow, From Alchemy to Quarks, Brooks/Cole (1993)
- T. Hey and P. Walters, The Quantum Universe, Cambridge U Press (1987).
- Halliday, Resnick, and Walker, Fundamentals ofPhysics, 6th ed, Vol 2, Wiley (2001).
- S. Harris, Einstein Simplified (Cartoons on Science) Rutgers U. Press (2001).
- R. D. Hill, Tracking Down Particles, Benjamin (1964).
- S. Hughes, Elementary Particles, 2nd ed, Cambridge U Press (1985).
- G. Kane, The Particle Garden, Addison-Wesley (1995).
- D. H. Perkins, Introduction to High Energy Physics, 2nd ed, Addison-Wesley (1982).
- H. Yagoda, Radioactive Measurements with Nuclear Emulsions, Wiley (1949).

Articles:

- R. Dzierba, C. A. Meyer, E. S. Swanson, "The Search for QCD Exotics", American Scientist, V88, Sept 2000, p 406.
- M. K. Gaillard, P. D. Grannis, and F. J. Sciulli, "The Standard Model of Particle Physics", A Celebration of Physics at the Millenium, ed. by B. Bederson, Springer (1999), p. 161.
- F. Sciulli, "Neutron and Proton Structure Today", Phil. Trans. R. Soc. London, V359 (2001) p. 241.
- F. Wilczek, "QCD Made Simple", Physics Today, Aug 2000, p 22.

Pamphlets:

- S. Butler and J. Conrad, "Neutrinos Matter"
- DESY Lab, "TESLA Linear Accelerator", Jan 2000.
