Where are we?

if all of the experiments are right...

	LSND	Atmos	Solar
$\nu_e \leftrightarrow \nu_\mu$	Necessarily (It's a signal)	Only if low Δm^2 + $\nu_\mu \rightarrow \nu_\tau$	Maybe
$\nu_e \leftrightarrow \nu_\tau$			Maybe
$\nu_e \leftrightarrow \nu_s$			Maybe
$\nu_\mu \leftrightarrow \nu_\tau$		Maybe	
$\nu_\mu \leftrightarrow \nu_s$		Maybe	

And Where do we go from here?

Yoji – more details of the solar & atmospheric terrain
